

ISCAP

Information Systems Certification and Accreditation Professional

Overview

Mile2®'s vendor-neutral Information Systems Certification and Accreditation Professional certification training quantify the process of certifying, reviewing and accrediting an information system by IT professionals. This certification is designed to provide, through its contents and referenced resources, a complete guide to establishing a certified and accredited information system in any organization. This course was created as a standard to measure the set of skills that specific members of an organization are required to have for the practice of certifying, reviewing and accrediting the security of information systems.

Upon Completion

Upon completion, the Information Systems Certification and Accreditation Professional candidate will be able to competently take the ISCAP exam.

Course Length

3 days
