PRISMA ACCESS SASE SECURITY: DESIGN AND OPERATION

Overview

The Prisma Access SASE Security: Design and Operation (EDU-318) course describes Prisma Access Secure Access Service Edge (SASE) and how it helps organizations embrace cloud and mobility by providing network and network security services from the cloud. This course is intended for people in the fields of public cloud security and cybersecurity, or for anyone who wants to learn how to secure remote networks and mobile users.

Course Objectives

Successful completion of this three-day, instructor-led course will help enhance your understanding of how to better protect your applications, remote networks, and mobile users using a SASE implementation. You will get hands-on experience configuring, managing, and troubleshooting Prisma Access in a lab environment.

Scope

- Level: Advanced
- Duration: 3 days
- Format: Lecture and hands-on labs
- Platform support: Palo Alto Networks Panorama and Prisma Access

Target Audience

Security Engineers, Security Administrators, Security Operations Specialists, Security Analysts, and Network Engineers

Prerequisites

Participants should have a basic knowledge of cloud computing and the public cloud. Participants must complete the Firewall 9.0 Essentials: Configuration and Management course and the Panorama 9.0: Managing Firewalls at Scale course, or have equivalent experience. Participants also must have experience with networking concepts including routing, switching, and IP addressing.

Course Contents

- Prisma Access Overview
- Planning and Design
- Activate and Configure
- Security Processing Nodes
- Panorama Operations for Prisma Access
- Remote Networks
- Mobile Users
- Tune, Monitor, and Troubleshoot
- Manage Multiple Tenants
- Next Steps
