

300-201 Defense Pro ERT Security

Overview

Extend beyond the DefensePro level 1 course in this 3-day, in-depth Radware DefensePro ERT Security certification training.

Learn how to mitigate different attack types and understand the underlying principles behind each technique. The course utilizes both theory and hands-on war games to help you master security threats, apply the most effective strategies to block them, and build your confidence in the application of this knowledge.

Course Length

3 days

Prerequisites

DefensePro Level 1. Knowledge of security concepts.

Delegates should also be proficient in basic PC operation and application, including skilled at operating a keyboard, mouse and Windows OS as well as basic Web browser operation (Internet Explorer used in class).

Certification

Successful completion of this advanced course, which includes War Games, as well as a proctored exam are required to earn Radware Certified Security Expert (RCSE) accreditation.

Topic Outline

- Day 1
 - Threat Landscape
 - Introduction to Radware AMS solution
 - Breakdown of Attacks

THE FOREFRONT OF TECHNOLOGY/SERVICE ADVANCES
